ARM deployment What-if

```
PowerShell
PS C:\ARM> $Parameters = @{
>>   ResourceGroupName   = "ARMTesting"
>>   Templatefile        = ".\azuredeploy.json"
>>   StorageAccountPrefix = "arm"
>>   Mode                 = 'Incremental'
>> }
PS C:\ARM> New-AzResourceGroupDeployment @Parameters -WhatIf
```

PSConf Europe

Watch Sessions

We'll make them freely available to everyone starting the weekend *May 30-31* so you have all the time to watch sessions and play with the techniques presented.

Join Discussions And Meet Speakers

On *June 2 and 3*, 5-9pm CEST, we then have a *virtual conference* with group sessions where you can meet your favorite speakers live for discussions and Q&A. The agenda will be published here once we have the details.

About psconf.eu

PowerShell Conference EU is Europe's largest annual PowerShell conference. Due to Corona, we postponed the conference to June 1-4, 2021 and work on a free virtual replacement event for this year.
